

PMH *Combi Hall*

The economical solution

PMH *Combi Hall*

The multi purpose hall

PMH Combi Hall is an effective and economically viable solution to the need for buildings. Clear width up to 50m, length optional.

PMH Combi Hall has many advantages in comparison to a conventional building such as large floor areas with no invasive columns, maintenance-free materials, low investment and short erection time. If the accommodation needs change, the hall can easily be extended, moved or dismantled and sold.

PMH Combi Hall is constructed using self-supporting frames, allowing maximum useable floor space with no invasive columns to 50m span and optional length.

Design

The structure is designed in accordance with current snow and wind loading.

Sizes

From 8m to 50m clear spans and optional length.

Framework

Lattice of cold-formed steel profiles and hot dipped galvanised to BS729 (min. 70 microns).

Anchoring

The structure can be anchored by means of earth spikes, ground anchors or a concrete ring beam.

Doors

A range of doors can be fitted to suit the customer's needs.

Walls

Profiled steel cladding in a range of colours, on lightweight steel purlins to an optional height above ground.

Roof and gable end infill

A durable PVC coated and lacquered fabric. The roof is white as standard and allows a uniform distribution of natural light.

Dehumidification

The structure thanks to its in-built air tightness, can easily be equipped with a suitable dehumidification unit, allowing a controlled environment, all year

PMH Combi Hall offers maximum useable floor space with no invasive columns with a translucent roof.

PMH Combi Hall can also be furnished with a dehumidification unit in order to store moisture sensitive goods.

round, without the need for heating. An ideal and energy efficient method of storing materials, with no corrosion or dampness.

Miscellaneous

The structure can be furnished with gutters and down pipes, provided that the wall cladding is taken to eaves height. It can also be insulated and be used for heated storage.

PMH Structures are also available in following designs:

- **PMH Storage Hall**
- **PMH Dry Air Hall**
- **PMH Rental Hall**
- **PMH Sport Hall**
