PMH Rental Hall

The new building that you rent

PMH Rental Hall is the perfect solution for short or long term building space for storage, sales shop, workshop and exhibition use.

PMH Rental Hall is available in two standard modules of 120 m² (10x12x3,0 m) and 180 m² (12x15x4,0 m) respectively, fitted with steel stable doors. Both sizes can be extended by connecting two or more modules and even be attached to an existing building.

PMH Rental Hall is fitted with a white roof as standard and allows a uniform distribution of natural light with no invasive columns. The walls are all vertical to allow maximum use of floor space. The hall can be erected adjacent to existing premises or manufacturing facility to avoid unnecessary transport costs.

PMH Rental Hall can be customized to allow different sizes and options.

Design

The structure is designed in accordance to current snow and wind loading criteria.

Framework

Lattice of cold formed steel profiles, and hot dipped galvanised to BS279 (min. 70 icrons).

Anchoring

The structure can be anchored by means of earth spikes, ground anchors or a ring beam.

Doors

The structure is fitted with manually operated steel framed and clad, sliding stable doors.

Walls and roof

Covered by an approved, PVC coated and lacquered maintenance-free fabric. The roof is white as standard and allows a uniform distribution of natural light.

Erection

The structure is easy to erect. Can be carried out by the customer, with assembly instructions provided or by professional supervision. It can be also offered a complete delivery and installation service.

PMH Rental Hall offers a maximum useable floor space, with no invasive columns and a translucent roof.

PMH Rental Hall can be furnished with a dehumidification unit to secure a controlled indoor environment.

Dehumidification

The structure thanks to its in-built air tightness, can easily be equipped with a suitable dehumidification unit, allowing a year round controlled environment, without heating. No corrosion or dampness, an ideal and energy efficient method of storing materials.

PMH Structures are also available in following designs:

- **PMH Storage Hall**
- **PMH Combi Hall**
- **PMH Dry Air Hall**
- **PMH Sport Hall**
