

# PMH *Storage Hall*

The flexible solution

# PMH Storage Hall

## The simple and flexible solution

**PMH Storage Hall** is an effective and economically viable solution to the need for large storage areas. It is available in different designs, sizes and colours.

**PMH Storage Hall** is fabricated from a developed system of standard components. The customer is given freedom of choice concerning door openings and other adaptations.

**PMH Storage Hall** is easily erected and dismantled. If the accommodation needs change, the hall can easily be extended, moved or dismantled and sold.

**PMH Storage Hall** has many advantages in comparison to a conventional building such as large, light surfaces with no invasive columns, maintenance-free materials, low investment and short erection time.

**PMH Storage Hall** is the basic model for **PMH Combi Hall** (profiled steel clad walls) and **PMH Dry Air Hall** (equipped with dehumidification unit). The hall can even at a later stage easily be insulated and used as a heated storage.

### Design

The structure is designed in accordance with current snow and wind loading criteria.

### Sizes

From 8m to 50m clear span and optional length.

### Framework

Lattice of cold-formed steel profiles and hot dipped galvanised to BS729 (min. 70 microns).

### Anchoring

The structure can be anchored by means of earth spikes, ground anchors or a concrete ring beam.

### Doors

A range of doors can be fitted to suit the customer's needs.

### Cladding

Walls and roof are covered by an approved, PVC coated and lacquered fabric, offering long durability. The wall fabric is available in several colours

PMH Storage Hall offers maximum floor space with no invasive columns and a translucent roof.

PMH Storage Hall is available in different sizes.

and is suitable for printing of commercials and company logo's. The roof is white as standard and allows a uniform distribution of natural light.

### Dehumidification

The structure thanks to its in-built air tightness, can easily be equipped with a suitable dehumidification unit, allowing a year round controlled environment, without heating. No corrosion or dampness, an ideal and energy efficient method of storing materials.

**PMH Structures** are also available in following designs:

- PMH Combi Hall
- PMH Dry Air Hall
- PMH Rental Hall
- PMH Sport Hall
